About Me

Hello! I'm a third-year accounting and finance student with a growing passion for technology and full-stack development. Recently, I embarked on an exciting journey into web development, where I discovered my enthusiasm for creating dynamic and engaging user experiences. My background in finance has equipped me with analytical skills that I apply to problem-solving in tech.

I am eager to apply my knowledge and skills to real-world projects, collaborate with like-minded individuals, and contribute to innovative solutions.

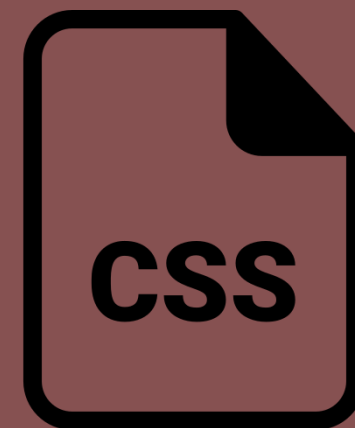

Thank you for visiting my portfolio! I look forward to connecting and exploring opportunities in the tech space.

Projects

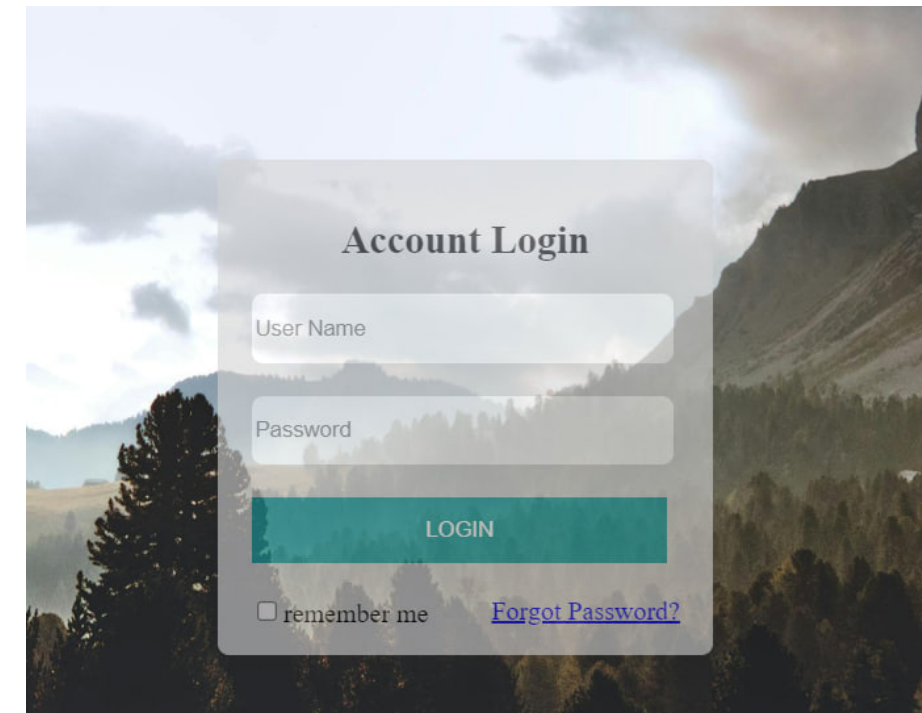

A Game Zone Website

An interactive website designed to be the ultimate hub for gamers. It features a user-friendly interface that allows users to explore a vast array of games across various genres, access reviews, and connect with other gamers.

[Github](#)[Live Demo](#)

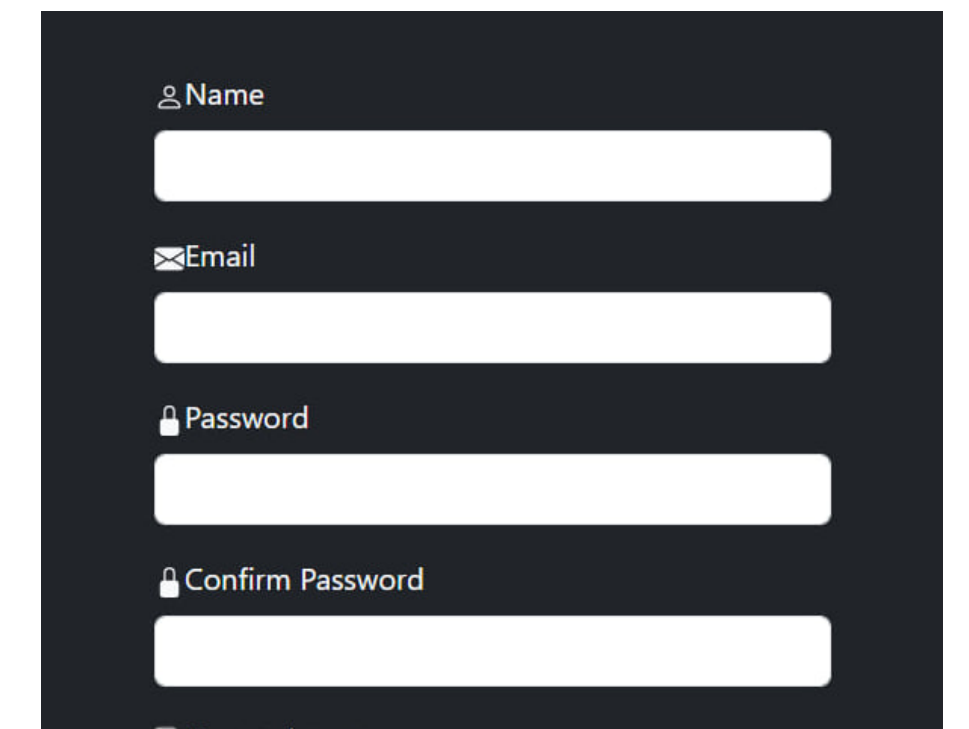

User Login Page

A user login page designed to provide a secure and user-friendly experience for accessing web applications. It is built with a focus on responsive design to ensure accessibility across various devices.

[Github](#)[Live Demo](#)

User Registration form

A responsive user registration page designed to allow new users to create accounts securely and efficiently. The page includes essential fields for user information, such as username, email, and password.
